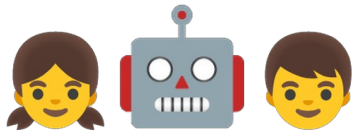
📖 PREFACE



Artificial Intelligence is becoming a part of everyday life, from the phones we use to the way we learn, travel and stay safe. Children today are growing up with smart helpers all around them. It is important that they understand AI early, in a simple, joyful and responsible way.

This book has been prepared for the Global AI Olympiad (GAIO) by Mamma Ada Centre, in collaboration with FACM, Italy. It follows the GAIO six-month journey: AI Discover, AI Connect, AI Solve, AI Rise, AI Create and AI Care. Each month introduces two topics suited to the curiosity and abilities of Class 4 learners.

Every topic begins with a colourful introduction and continues with "Learn with Bolt", where Meera, Arjun and their robot friend Bolt explain ideas through friendly conversations and picture words. An illustrated story, real-life examples, hands-on activities, worksheets, puzzles, quizzes and standard exercises help children learn by seeing, reading, doing and thinking.

Values are at the heart of this book. Along with learning what AI can do, children learn that people create and guide technology, that AI can make mistakes, and that safety, kindness and privacy matter online and offline.

> 🤝 **A note for teachers and parents**
>
> Read the conversations and stories aloud with children, encourage them to ask questions, and use devices together with them. Praise effort and curiosity more than right answers. An answer key is provided at the end of the book.

We hope this book sparks curiosity, creativity and confidence in every young learner. Curious minds, brighter futures!

With best wishes,

The GAIO Academic Team

Arjun

Arjun: Bolt, I am an AI detective today 🔍! Where is AI hiding?

Bolt: AI hides in many things we use every day! Look for three clues: guess, suggest, recognise.

Bolt

Meera

Meera: Clue 1: Guess. My keyboard ⌨️ guesses the next word I type!

Bolt: Correct! That is AI predicting words from patterns.

Bolt

Arjun

Arjun: Clue 2: Suggest. The video app 📺 suggests cartoons I like.

Bolt: Yes! AI learnt what you enjoy and suggests more.

Bolt

Meera

Meera: Clue 3: Recognise. The phone 📱 unlocks when it sees my face 🙂.

Bolt: Super! AI recognises your face from its shape and features.

Bolt

Arjun

Arjun: What about a map 🗺️ that finds the fastest road?

Bolt: AI again! It checks traffic 🚗🚕 and suggests the best way.

Bolt

Meera

Meera: Is a calculator 🧮 AI?

Bolt: No! It only follows fixed rules. It does not learn or guess. Good thinking, detective!

📚 STORY TIME: Detective Arun and the Hidden AIs

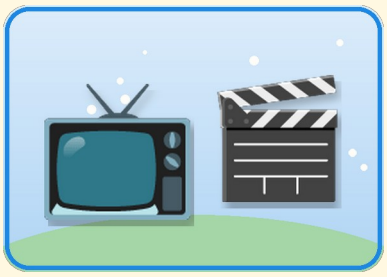
👦 Arun 👩 Amma 🤖 Bolt

SCENE 1

Arun put on his detective cap 🕵️ and picked up his magnifying glass. "Today I will find every hidden AI in my house!"

Clue 1: Amma typed a message. The keyboard guessed 'See you soon' before she finished! "Aha! AI guessing!" said Arun.

SCENE 2



SCENE 3

Clue 2: The TV app showed his favourite cartoon 🎬 first. "It suggests what I like. That's AI!"

Clue 3: Appa's phone opened just by looking at his face. "It recognises faces! AI number three!"

Meera Arjun Bolt

📢 **Read aloud with friends! Each friend reads one part.**

Meera

Meera: Bolt, how does a smart machine work?

Bolt: Smart machines do three things: sense 👀, think 🧠 and act 🦾.

Bolt

Arjun

Arjun: Sense? Like our eyes and ears?

Bolt: Yes! Machines use sensors. A camera 📷 is like an eye. A microphone 🎤 is like an ear.

Bolt

Meera

Meera: And a thermometer 🌡️ feels heat, like our skin!

Bolt: Great! After sensing, AI thinks and decides what to do.

Bolt

Arjun

Arjun: Then it acts?

Bolt: Yes! A robot vacuum 🧹 senses a wall, thinks 'turn', and acts by turning ↩️.

Bolt

Meera

Meera: What about an automatic door 🚪?

Bolt: It senses you walking, decides you want to enter, and opens. Sense, think, act!

Bolt

Arjun

Arjun: So I am a smart machine too! I see a ball ⚽, think 'catch', and catch it!

Bolt: Ha ha! Humans did it first. Machines copy the idea!

Bolt: Agents Meera and Arjun, your mission 🎯: guide me to the treasure 💎!

Bolt

Meera

Meera: What are instructions, Bolt?

Bolt: Instructions are step-by-step commands. Computers follow them exactly, one by one.

Bolt

Meera

Meera: What if we said 'turn left' by mistake?

Bolt: I would go the wrong way ❌! A mistake in instructions is called a bug 🐞.

Bolt

Arjun

Arjun: Then we fix it! That is called debugging 🔧.

Bolt: Exactly! And a full set of instructions for a computer is called a program 💻.
